PROFESSIONAL SUMMARY

.NET Full Stack Developer with 3.5 years of experience building scalable enterprise applications using .NET 7,8, C#, ASP.NET Core Web API, Entity Framework Core, Angular 7,13,16,20, SQL Server and Azure. Experienced in designing Microservices and Event-Driven Architectures, Clean Architecture, SOLID Principles, Design Patterns, Async/Await, REST APIs, Web Services, RxJS, Reactive Forms, Standalone Components and SSR. Hands-on with Azure Service Bus, Azure Key Vault, Azure Functions, Repository Pattern, Redis and CI/CD. Promoted to Senior Software Engineer within 1 year and delivered 3+ production applications serving 500+ users.

TECHNICAL SKILLS

Backend: C#, .NET 7,8, ASP.NET Core Web API, ASP.NET MVC, RESTful APIs, Web Services, JSON, Entity Framework Core, LINQ, Repository Pattern, Async/Await

Architecture: Clean Architecture, SOLID Principles, Design Patterns, Microservices Architecture, Event-Driven Architecture, Distributed Systems, System Design

Frontend: Angular 7,13,16,20, Standalone Components, TypeScript, JavaScript (ES6+), RxJS Operators, Reactive Forms, Lazy Loading, SSR, NgRx, Angular Material, Bootstrap, HTML5, CSS3

Database & Caching: SQL Server, MySQL, Redis (Caching)

Cloud/Tools: Microsoft Azure, Azure App Service, Azure Functions, Azure Service Bus, Azure Key Vault, Git, GitHub, Swagger, Postman, JIRA, CI/CD Pipelines

Testing & Practices: Unit Testing, xUnit, Jasmine, Karma, Agile/Scrum, Code Review, SDLC, JWT Authentication, Role-Based Access Control

PROFESSIONAL EXPERIENCE

Senior Software Engineer

Mar 2023 – Jul 2026

CentraLogic Consultancy Pvt. Ltd. | Pune, India

- Led architecture and full-stack development of 3+ enterprise applications using .NET Core, C#, Entity Framework and Angular (v7–20), each serving 500+ active users in production.
- Built .NET Core Web APIs on SQL Server/MySQL with Entity Framework and LINQ; implemented Redis caching (-25% API response time) and JWT-based authentication with role-based access control.
- Built a reusable Angular component library adopted across 3 projects (-30% frontend dev time), using Lazy Loading, RxJS, NgRx, Bootstrap and Angular Material.
- Designed backend services with Clean Architecture, SOLID principles, Repository Pattern and async/await; worked with Azure Service Bus, Azure Key Vault, App Service and Azure Functions.
- Wrote unit tests using xUnit to improve code reliability across enterprise applications.
- Led a team of 3 engineers across 2-week Agile sprints (JIRA), achieving 100% on-time delivery; collaborated with clients on requirements and mentored 2 junior developers.

KEY PROJECTS

HR Anexi — Enterprise Survey Platform

Angular 16,20, .NET 7,8, C#, ASP.NET Core Web API, Microservices, Entity Framework Core, Clean Architecture, Azure Service Bus, Azure Functions, SQL Server, RxJS, CI/CD

- Led full-stack development of a large-scale employee survey platform with advanced reporting and data visualization dashboards built on Angular 16 and .NET Core Web API with SQL Server backend.
- Architected backend as microservices using ASP.NET Web API, Entity Framework Core, Clean Architecture and Repository Pattern; adopted event-driven patterns and Azure Service Bus for asynchronous processing.
- Implemented analytics features providing actionable HR insights for enterprise stakeholders managing 1,000+ employee responses.
- Built scheduled background jobs using Azure Functions and integrated Azure Key Vault for secure configuration and secrets management.

- Built Angular modules using Standalone Components, Reactive Forms, RxJS, Lazy Loading and reusable components.
- Set up CI/CD pipelines for automated build, test, and deployment of the platform.

Mentoria — Career Counselling Platform

Angular 13, REST APIs, TypeScript, Angular Material, Bootstrap, Microservices, Azure Functions, Swagger

- Developed core frontend modules for career assessments and personalized recommendation engine using Angular and RxJS, improving platform engagement for 5,000+ registered users.
- Styled and built responsive UI components using Bootstrap alongside Angular Material, ensuring a consistent, mobile-friendly experience across the platform.
- Consumed microservices-based REST APIs, including Azure Functions endpoints, documented and tested via Swagger, to power the recommendation engine.
- Worked closely with product and business stakeholders to iterate rapidly and deliver features on schedule.

HRMS Document Management

Angular 7, .NET Core, C#, SQL Server, Microservices, Azure Functions, Swagger, Role-Based Access Control

- Built a document storage and sharing platform with file versioning and role-based access control using Angular frontend and .NET Web API backend.
- Structured backend services as microservices, using Azure Functions for file-processing tasks and Swagger for API documentation and testing.
- Reduced manual document handling effort by 20% for the HR team through automated workflows and secure file management.

EDUCATION

Master of Computer Applications (MCA)

2021 – 2023

Savitribai Phule Pune University | 77.08%

Bachelor of Computer Applications (BCA)

2018 – 2021

Savitribai Phule Pune University | 88.67%

CERTIFICATIONS

- Back-End Development with .NET — Microsoft
- Advanced React — Meta
- Programming with JavaScript — Meta
- Agile Project Management — Google
- OKR Certification: Leadership & Goal Setting — Measure What Matters

KEY ACHIEVEMENTS

- Promoted to Senior Software Engineer within 1 year based on strong technical delivery and leadership impact.
- Delivered 3+ enterprise production applications using .NET Core and Angular on time, each serving 500+ active users.
- Reduced average API response time by 20% by implementing Redis caching strategies for high-traffic endpoints.
- Reduced frontend development effort by ~20% by architecting reusable Angular component libraries adopted across multiple projects.
- Represented company at client sites and maintained 100% on-time milestone delivery across all projects.
- Reduced manual HR document handling effort by 20% through automated Angular + .NET Core workflows with role-based access control.
